Ali Raza

Software Engineering Student | Java & Python Developer | MySQL, JavaScript, HTML, CSS | Freelancer
Karachi Division, Sindh, Pakistan

Summary

Hi! I'm Ali Raza, a passionate and detail-oriented Software Engineering Student with hands-on experience in app development, web development, AI, machine learning, and data science. I specialize in creating smart, scalable, and efficient digital solutions using Python, Java, C, and modern web technologies.

What I Do Best:

Develop mobile and web applications from scratch

Build AI/ML models for predictions, automation, and insights

Perform data analysis and visualization to support business decisions

Write clean, efficient, and maintainable code

Apply prompt engineering to enhance AI interactions

Since July 2024, I've been working as a freelance developer, delivering high-quality projects with a focus on clear communication, timely delivery, and creative problem-solving. My goal is to turn ideas into impactful technology that drives real results.
